

Cancun, Quintana Roo, January 15th 2021

Dear Business Partners,

At **BD Experience** we want our visitors to enjoy their stay safely, complying with the recommendations and health guidelines required by the corresponding authorities, which is why, as of January 2021, we include the PCR tests (Polymerase Chain Reaction) in our catalog of products and services. This is the most accurate test that exists, so far, to know if a person is infected or not with the SARS-CoV-2 virus.

BD Experience offers this service as countries such as **Canada**, the **United Kingdom** and most of the countries in **South America**, require this proof for all international travelers returning to their respective countries by air.

BD Experience, anticipating this requirement and with the intention of assisting our mutual clients, carried out an intense negotiation with laboratories in **Cancun** and the **Riviera Maya**, in order to reduce the costs of the tests and with the exclusive benefit that they can be carried out in the hotels themselves. In this way, our clients enjoy their vacations without worries.

At BD Experience, we help our clients to travel safely and with confidence; which represents a great added value for travelers, who do not have to worry or lose any unnecessary time complying with these requirement. This demonstrates our commitment to exceed tourist expectations and guarantees safe and efficient processes in the face of the challenges and needs required by the current context of the COVID-19 pandemic, helping to achieve complete peace of mind and satisfaction of our visitors.

For more information we share with you the new LinkedIn and Instagram of BD Experience:
