

Cancún, Quintana Roo, July 24th, 2021

Dear Commercial Partner,

We would like to inform you that Carlos Joaquin, our state governor, has issued the "safe access and open spaces program", in hotels, restaurants, boats and all commercial establishments. This program will take immediate effect, and aims to prevent infections in establishments and to continue the promotion of the economic recovery.

The 'safe access and open spaces program' consists of the following criteria:

Respect the established capacity.

At entrances, all clients will be requested to show proof of vaccination or a negative antigen or PCR test which was taken no more than 72 hours previously.

To make sure that all staff are vaccinated or have a negative test for Covid-19.

Do not allow customer access after 10:30 pm and to close establishments at 11:00 pm.

Privileged open spaces and install air purifying filters in spaces that cannot be naturally ventilated, and to use Carbon Dioxide meters to check air quality.

It is important for BD Experience to inform you of these implemented established measures, in order to ensure our mutual clients enjoy the destination in safe spaces.

Sincerely,

Laura Triay
Managing Director DMC
